Engine	3TNV70-WBVB
Net Power	12.5 HP
Operating Weight	1235 kg
Tear-out force	5.6 kN
Breakout force	13.7 kN

Design

JOYSTICKS

IMPROVED ERGONOMICS

The use of joysticks on both sides of the seat enables to improve the position of the operator, therefore enhancing his comfort while working.

With the joysticks, the operator also has a better control over the machine movements. Manoeuvrability, productivity and precision are increased.

SIMPLICITY AND ROBUSTNESS

Yanmar decided to use the same tried and tested joysticks as for its heavier mini-excavators. This well-conceived system offers the following features:

- Less risk of damages and downtime
- Longer service life

OTHER FEATURES

- Operating weight: 1235 kg
- Longest undercarriage of its class with 1440 mm
- Extendable undercarriage of unique conception: reduced clearance between the sliding parts, no soil build-up during the extension of undercarriage.
- Simple folding extendable blade
- A large engine bonnet allows quick access to the main components

Excellent stability

The ViO12 has an operating weight of 1235 kg and the longest undercarriage of its class with 1440 mm. This results in a real improvement of the operator's comfort. He benefits from a smoother drive and increases his productivity.

The machine is also more stable with heavy loads or attachments. This is very important for key applications for this type of mini-excavator, such as demolition.

BEST COMPONENTS

All ViO12 components are designed in order to make it reliable, durable and capable of performing demanding work.

KINEMATICS

Leading

CUSTOMER BENEFITS

BETTER PERFORMANCE

IMPROVED CYCLE-TIMES

INCREASED PRODUCTIVITY

performance

ENGINE

The ViO12 is equipped with a Yanmar diesel engine 3TNV70 which delivers a power of 9.2 kW and has a torque of 52 Nm. This enables to improve highly the performance of the machine.

HYDRAULICS

Unlike industry standards for this category of machines, Yanmar is using variable axial piston pump which adapt the flow and the pressure to the load, allowing smoother operation and improving the comfort of the operator. The pump flow of 2 x 11 l/mn and its high working pressure (210 bar) also enable to improve the productivity of the machine and its speed in working motion.

PERFORMANCE

The attention paid to the quality of the power line ensures excellent performance while the optimal combination of the ViO12 excavation strengths and work cycles assures exceptional productivity.

Technical specifications

Engine	
Yanmar diesel 3 cylinders	3TNV70-WBVB
Rated output	9.2 kw/12.5 HP/2000 rpm
Displacement	854 cm³
Max. torque	52 N.m./1500 rpm
Hydraulic circuit	
System capacity	14.3 l
Max. pressure	210 bar
Variable flow dual piston pump	2 x 11 l/min
Performances	
Travelling speed	2.1 to 4 km/h
Swing speed	10 rpm
Digging force (arm/bucket)	570/1400 kgf
Boom swing (L/R)	50°/90°
Ground pressure	0.26 kg/cm²
Grade ability	30°
Shoe width	180 mm
Ground clearance	140 mm
Blade (width x height)	830/1000 x 220
Miscellaneous	
Fuel tank	12 l
Cooling system	2.5 l
Transport dimensions (L x w x h)	3040 x 1000 x 1420 mm
Noise level LwA	88 dBA
